DETAILED ACTION

1. The Action is responsive to pre-appeal brief conference request filed

12/11/2009.

2. After a thorough search and examination of the present application, and in light of the following:

prior art made of record;

a review of pre-appeal conference and its decision to re-open; and

a update search on prior art conducted in domains (EAST, NPL-ACM, Google, NPL-IEEE, etc);

Claims 1-21 are allowed.

Reason for Allowable

3. The following is the Examiner's statement of reasons for allowance:

In the Examiner's Office Action of July 16, 2009, the Final Rejection under 35 U.S.C. § 102 rejections was made mainly based on the reference: **Kato** et al. ("INFORMATION PROCESSING APPRATUS AND METHOD, RECORDED MEDIUM, AND PROGRAM", U.S. Patent Application Publication 2002/0150383, filed 4/20/2001 and published 10/17/2002, hereafter "Kato")

In response to the above rejections, Applicant argued that "Kato does not teach first playlist information used to manage playback of the first data stream, as recited in the claims Applicant further appreciates that the Examiner interprets the management

information file created by the controller (23) during the recording process of Kato as first playlist information, and the selection of playlist information during the playback process of Kato as second playlist information. (see, OA, page 15.) With further reference to the independent claims, Kato also does not teach a first playlist information which is used to manage playback of the first data stream. To the extent that the Examiner considers the management information file and the selection of playlist information to be the first and second playlist informations, both manage playback of the packetized data stream (i.e., the second data stream) that is stored on the recording medium. As discussed above, **the AV encoded data stream (i.e., the first data stream) is not stored.**”

Based on the above consideration, an analysis of the detailed subject matter related to video signal encoding in instant application suggests that the subject matter as described and high-lighted below distinguishes from prior art.

acquiring first playlist information which is used to manage playback of the first data stream;

generating a second data stream by encoding the video signal by a second encoding process, which is different from the first encoding process; and

producing second playlist information based on the second data stream and the first playlist information so as to manage an order in which the second data stream is played

back

An update search on prior art in domains (EAST, NPL-ACM, Google, NPL-IEEE, etc) has been conducted. The prior art searched and investigated in the domains (EAST, NPL-ACM, Google, NPL-IEEE, etc) do not fairly teach or suggest teaching of the subject matter as described by the combined limitation in each of the independent claims 1, 11 and 21.

The dependent Claims in the groups (2-10) and (12-20), respectively depending upon claims 1 and 11, respectively, also distinct from the prior art.

After a search and a thorough examination of the present Application and in light of the prior arts, Claims 1-21 re allowed.

Conclusions

4. Any comments considered necessary by Applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
